- c) comprises.
- d) climb

A.4

- a) from ----- on
- b) Visitors ----- bringing
- c) had had ----- would have undertaken
- d) Joanna apologized because she could not go to the expedition with her friends.

A.5

Explain the pros and cons of adventure holidays.

Adventure holidays are a popular choice for people who enjoy doing exciting and unusual activities during their vacation. These trips often include sports like climbing, surfing, or exploring wild places. There are both advantages and disadvantages to this type of holiday.

One advantage is that adventure holidays are fun and exciting. They give people the chance to try new things and feel a sense of achievement. These experiences can also help people build confidence and reduce stress. In addition, they are usually highly active, which is good for your health and fitness.

However, there are also some disadvantages. Adventure holidays can be dangerous if they are not planned well. Some activities carry risks, and people may get hurt if they do not have the right equipment or training. Also, these holidays can be expensive, especially if they take place in faraway locations. Some people might also find them too tiring or uncomfortable.

In conclusion, adventure holidays can be a wonderful experience for people who enjoy physical activity and new challenges. Still, it is important to be careful and well prepared to stay safe and enjoy the trip.

MODELO B

B.1

a) FALSE: "Air pollution is a far bigger killer than extreme climate, which dominates discussions nowadays."

b) TRUE: "Cleaning up transport implies fewer vehicles, cleaner cars, and more walking and cycling, all of which can save 5 million lives a year".

B.2

a) She used the convention to make people aware of the negative impact that using fossil fuels has on people's lives, and to influence politicians to act.

b) Air contamination produces an enormous number of deaths annually because it causes problems in the lungs.

B.3

a) ready

b) implies

c) shift

d) support

B.4

a) who ----- unable

b) healthier ----- to make

c) is thought ----- of

d) finishing ----- stressful / stressing

B.5

Do you think that only governments can do something to limit pollution or that individuals can contribute too? Justify your opinion.

In my opinion, both governments and individuals can help to reduce pollution. It is not only the responsibility of governments, but also of every person in society.

On one hand, governments can make important decisions that affect the whole country. For example, they can create laws to reduce the use of plastic, control emissions from factories, and invest in public transport. These actions can have a significant impact on the environment.

On the other hand, individuals can also contribute in many ways. People can recycle at home, use less water and electricity, or choose to walk or ride a bike instead of driving. If many people do small actions every day, the result can be incredibly positive.

Moreover, individuals can influence governments. When citizens care about the environment, they can vote for political leaders who support green policies. They can also participate in campaigns and activities to raise awareness.

In conclusion, pollution is a severe problem that needs everyone's help. Governments must create strong policies, but individuals must also act responsibly. If we all work together, we can protect our planet for future generations.
