A.2

- a) She defends equal treatment for different races and more opportunities for females working in engineering.
- b) They have had many different difficulties because of their personal challenges and they have had a considerable influence.

A.3

- a) accurate
- b) basis
- c) set
- d) static

Question A.4

- a) visiting ----- which / that
- b) of ----- have changed / have been changing
- c) working / having worked ----- was offered
- d) would be / would have been ----- technological

A.5.- Write about 150 to 200 words on the following topic. Do you think that we depend too much on technology? Justify your answer

I think we depend too much on technology today. We use it every day for many things like talking to friends, working, studying, and even cooking or exercising. Technology makes life easier, but sometimes we forget how to do things without it. For example, many people use GPS to find places, so they don't learn how to read a map or remember directions. Students also use the internet to find answers quickly, which means they don't always learn how to solve problems by themselves.

Also, because of technology, people spend less time talking face-to-face. They often look at their phones even when they are with others. This can make relationships weaker. Too much screen time can also lead to health problems like eye strain, poor sleep, or lack of exercise.

In conclusion, technology is helpful and important, but we should not use it all the time for everything. It's good to take breaks and try to do things in other ways too, so we stay healthy and independent.

MODELO B

B.1

a) FALSE: "For centuries, people all around the world have been making chicken soup when someone is sick and it's a tradition that has been passed down through generations."

b) TRUE: "In particular, it's been proved that its taste stimulates our appetite when we are sick."

B.2

a) People enjoy eating soup because it is warm and it is tasty.

b) They stop eating due to their swollen throat, which makes them feel pain.

B.3

a) actually

b) significant

c) remedy

d) potential

B.4

a) Speaking ----- grow up

b) went ----- better

c) neither ----- under

d) She asked me whether / if I liked chicken soup when I was a child.

B.5.- Write about 150 to 200 words on the following topic. Describe and justify what a healthy diet is for you.

For me, a healthy diet means eating the right kinds of food in the right amounts to stay strong and feel good. It includes a balance of fruits, vegetables, whole grains, proteins like chicken, fish, or beans, and healthy fats such as olive oil or nuts. It is important to eat diverse types of food because each one gives the body something it needs, like vitamins, minerals, or energy.

A healthy diet also means drinking enough water every day and avoiding too much sugar, salt, and junk food. These things can taste good, but they are not good for your body if you eat them too often. They can cause problems like weight gain, diabetes, or heart disease.

It is okay to enjoy a sweet or a snack sometimes, but the most important thing is to have balance. I also try not to skip meals and to eat at the same times each day. This helps me feel better and have more energy. A healthy diet is not only about eating well but also about feeling happy and comfortable with your food choices.
